

## Science Home-learning

What can you remember about solid, liquids and gases from last term?

Can you name some of the properties of each?

- What would life be like without solids?
- What would life be like without liquids?
- What would life be like without gases?
- 

Can you write an answer for each one of these questions?

For example: If we didn't have solids we would have to stand up all the time as there would be no chairs.
