

## **Maths home learning 19.10.20**

Please look at previous weeks learning and links to maths resources for additional support.

### **Monday**

1. Check children can add one and subtract one from any number.

So, one more than 42 is 43 and one less than 42 is 41.

55, 67, 88, 76, 23, 56, 12, 35, 43, 96

### **Tuesday**

2. Adding 10 more and 10 less – see worksheet to support this.

So, 10 more than 22 is 32 and 10 less than 22 is 11

### **Wednesday**

1. Adding 1 digit to 2 digits

$$12 + 6 =$$

$$23 + 5 =$$

$$32 + 4 =$$

$$46 + 2 =$$

Children can use objects to do this. They can then draw the calculation and add this way as well as number lines. There is also a worksheet to support this.

### **Thursday**

1. Adding 1 digit to 2 digits

This time children are adding crossing 10. Again, they can use resources, drawing and number lines to support this.

$$14 + 7 =$$

$$27 + 8 =$$

$$36 + 6 =$$

$$47 + 7 =$$
