

Science

In science this week we will be looking at how the circulatory system works in the human body.

Research the job roles of these key parts of that system:

- The heart
- The lungs
- The arteries and veins.

Can you create ten questions (with answers) that you could ask someone at home about what you have learnt? Could you create your own quiz to ask the questions? I would do mine in the style of Who Wants To Be A millionaire but I'm sure you can think of a better way.

Useful video:
